

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (original) A photocurable composition comprising the following components (A) to (D):

(A) at least one of (meth)acrylates having structures shown by the following formulas (1) and (2),

wherein  $R^1$  represents a hydrogen atom or a halogen atom excluding a fluorine atom,  $R^2$  is a hydrogen atom, a halogen atom excluding a fluorine atom,  $\text{Ph-C(CH}_3)_2-$ ,  $\text{Ph-}$ , or an alkyl group having 1-20 carbon atoms, and  $R^3$  represents  $-\text{CH}_2-$ ,  $-\text{S-}$ , or  $-\text{C(CH}_3)_2-$ ;

(B) a (meth)acrylate having three or more functional groups, excluding the (meth)acrylates of the component (A);

(C) a radical photoinitiator; and

(D) a polycarbonate polyol having a hydroxyl value of 10-100;

wherein 5-50 wt% of the total acrylic components in the composition are methacrylate compounds.

2. (currently amended) The photocurable composition according to claim 1, wherein a cured product of the composition has a refractive index of 1.55 or more at 25°C.

3. (currently amended) The photocurable composition according to claim 1 ~~or 2~~, wherein a cured product of the composition has a softening point of 40°C or more.

4. (currently amended) The photocurable composition according to ~~any one of claims 1 to 3~~ claim 1, which is used to form an optical part.

5. (currently amended) An optical part obtained by curing the composition according to ~~any of claims 1 to 4~~.
